

# Account aggregation for business accounts

Find out where we're connected in Sweden and the UK, and the capabilities that are supported.

Through a single API, you can connect to the major banks across Sweden to access business accounts and transaction data. Below are the market capabilities and data coverage for Sweden and the UK. We only consider a market covered when we have foolproof, quality connections to banks and financial institutions that serve the majority of the population – and with enough data points to paint a full financial picture.
